This KN95 Respirator Mask helps protect against certain particulate contaminants but does not guarantee to eliminate the exposure to, or the risk of coming in contact with, diseases or infection. Please note that masks are generally used by infected people to prevent spread, compared with preventing healthy people from becoming ill.

KN95 Respirator Mask Attributes:

Filter Performance	≥95%
Flow Rate	85 L/min
Inhalation Resistance	≤ 350 Pa
Exhalation Resistance	≤ 250 Pa

NOTE: These preventative masks comply with regulations/certifications as indicated and are but one component of responsible administration of health care services. EOS makes no claims or guarantees related to the ongoing health of users or patients.

Made in China.
